***R I = Carnegie Classification- Research University I**

These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate degree, and give high priority to research. They award 50 or more doctoral degrees each year. In addition, they receive annually at least \$40 million or more in federal support.

R II = Carnegie Classification-Research University II

These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate degree, and give high priority to research. They award 50 or more doctoral degrees each year. In addition, they receive annually between \$15.5 million and \$40 million in federal support.

Note: Future Carnegie Classifications will Change- Expected 2005

We are currently engaged in a fundamental reconsideration of the Carnegie Classification. We plan to develop a more flexible system that will permit institutions to be grouped in several ways, in recognition of the fact that a single classification scheme can conceal the many ways that institutions resemble or differ from one another. This work will result in a series of distinct classification schemes, as well as an interactive facility that will enable users to generate their own, customized classifications.
